information has come to be regarded as a symbol of the age in which we live talk nowadays is of an information technology revolution even of an information society but just what does this mean in theories of the information society frank webster sets out to make sense of the information explosion he examines and assesses a variety of images of the information society and takes a sceptical look at what thinkers mean when they do refer to an information society he looks closely at different approaches to informational developments and provides critical commentaries on all the major post war theories

society to an information society

today information and the technologies that store and disseminate it are producing deep rooted and widespread changes in society changes of the same magnitude as those that occurred during the industrial revolution the purpose of this book is to give a complete picture of the information society by examining in detail the social economic political and cultural roles of information and information technology this book is effectively a second edition of the author s classic the information society in it the author illustrates the major trends in and inter relationships between information information and communication technologies and the global economy and society in tracing the direction of information based change he reveals the implications for ordinary citizens for the quality of everyday life for economic and social activity and examines the prospects of nations and trading blocs this book provides a new way of looking at society one that is essential for understanding social and economic structures and processes in the information age

what are we to make of the information society many prominent theorists have argued it to be the most profound and comprehensive transformation of economy culture and politics since the rise of the industrial way of life in the 18th century some saw its arrival in a positive light where the dreams of democracy of connectivity and efficiency constituted a break with the old ways but other thinkers viewed it more in terms of the recurrent nightmare of capitalism where the processes of exploitation commodification and alienation are given much freer rein than ever before in this book robert hassan a prominent theorist in new media and its effects analyses and critically appraises these positions and forms them into a coherent narrative to illuminate the phenomenon surveying the works of major information society theorists from daniel bell to nicholas negroponte and from vincent mosco to manuel castells the information society is an invaluable resource for understanding the nature of the information society as well as the meta processes of neoliberal globalisation and the revolution in information technologies that made it possible

the past three decades have witnessed the worldwide growth of an information industry and the definition of the new information sector with modern telecommunications and information technology the industrialized nations are creating a system in which information goods and services can be bought and sold as in a goods market place this book defines informatization in three ways infrastructure economic and social the analysis focuses on 19 countries which are categorized as high middle and low income nations by gross domestic product per capita the countries include australia brazil canada china france germany hong kong india japan mexico the netherlands new zealand singapore south korea taiwan uk and usa

pulling together contributions to the information society debate from some of the field's key figures this book addresses and examines key topics providing an invaluable resource for students and academics alike

popular opinion suggests that information has become a distinguishing feature of the modern world where once economies were built on industry and conquest we are now instead said to be part of a global information economy in this new and thoroughly revised edition of his popular book author webster brings his work up to date both with new theoretical work and with social and technological changes such as the rapid growth of the internet and accelerated globalization and reassesses the work of key theorists in light of these changes this book is essential reading for students of contemporary social theory and anybody interested in social and technological change in the post war era

whether termed the network society the knowledge society or the information society it is widely accepted that a new age has dawned unveiled by powerful computer and communication technologies yet for millennia humans have been recording knowledge and culture engaging in the dissemination and preservation of information in the early information society the authors argue for an earlier incarnation of the information age focusing upon the period 1900 1960 in support of this they examine the history and traditions in britain of two separate but related information rich occupations information management and information science repositioning their origins before the age of the computer and identifying the forces driving their early development the early information society offers an historical account which questions the novelty of the current information society it will be essential reading for students researchers and practitioners in the library and information science field and for sociologists and historians interested in the information society

this lively and engaging text introduces students to the major debates and data on the information society and at the same time teaches them how to research it it gives an overview of theorists of the information society particularly manuel castells and daniel bell social research methodologies including positivist interpretivist critical and cultural qualitative and quantitative research methods and criteria for social science evaluation drawing on a rich body of empirical work it explores three core themes of information society debates the transformation of culture through the information

revolution changing patterns of work and employment and the reconfiguration of time and space in everyday life in exploring these the reader is introduced through case studies activities and questions for discussion to the practicalities of doing social research and the nature of social science argument and understanding

global information society operating information systems in a dynamic global business environment is a collection of new ideas latest technology applications and experiences in global information systems development and operations it contributes significantly to the academic research and corporate business communities book jacket

uniting a team of international and interdisciplinary scholars this volume considers the views of early twentieth century european thinkers on the creation dissemination and management of publicly available information interdisciplinary in perspective the volume reflects the nature of the thinkers discussed including otto neurath patrick geddes the english fabians paul otlet wilhelm ostwald and h g wells the work also charts the interest since the latter part of the nineteenth century in finding new ways to think about and to manage the growing body of available information in order to achieve aims such as the advancement of western civilization the alleviation of inequalities across classes and countries and the promotion of peaceful coexistence between nations in doing so the contributors provide a novel historical context for assessing widely held assumptions about today s globalized post modern information society this volume will interest all who are curious about the creation of a modern networked information society

there has been much debate over the idea of the information society some thinkers have argued that information is becoming the key ordering principle in society whereas others suggest that the rise of information has been overstated whatever the case it cannot be denied that informization has produced vast changes in advanced societies the information society reader pulls together the main contributions to this debate from some of the key figures in the field major topics addressed include post industrialism surveillance transformations the network society democracy digital divisions virtual relations with a comprehensive introduction from frank webster selections from manuel castells anthony giddens michel foucault and christopher lasch amongst others and section introductions contextualising the readings this book will be an invaluable resource for students and academics studying contemporary society and all things cyber
